

Tech Tips:

AF196 – TC FUEL LINE ROUTING

The following photos are in sequence to show the TC fuel line routing from the tank to the pump.

1- Fuel line passes under rear cross member

2- Be careful not to crimp fuel line when using jack

3 – Original fuel line shows pitting from road debris

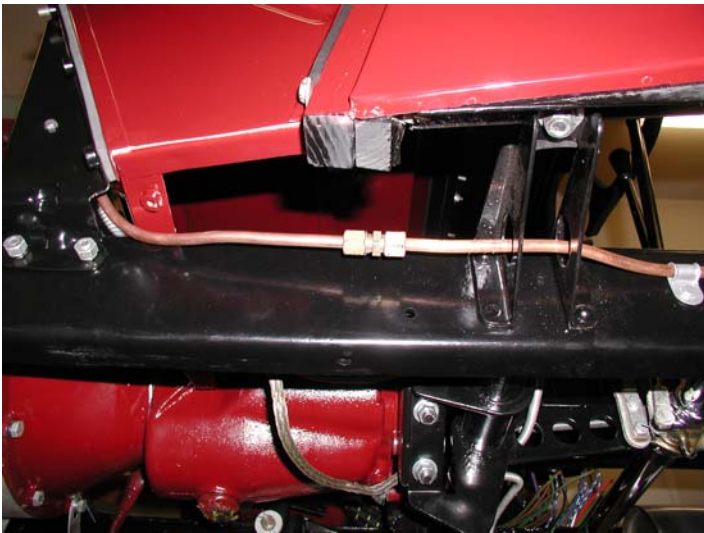

4 – Routing under side curtain box.

5 – Routing along main frame

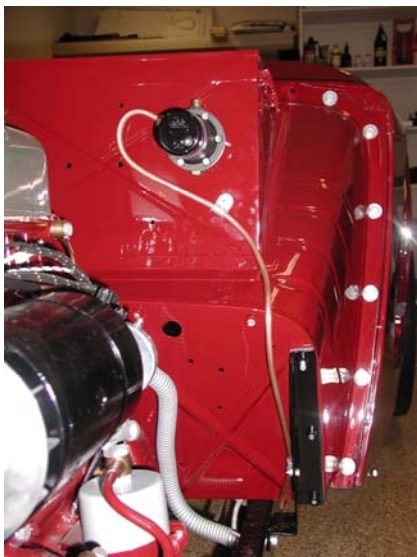

6 – Total of 7 clips from tank to pump

7 – Location of union for fuel line

8- All clips are held by 2BA setscrew

9 – Final clip on battery box

SAFETY FAST!
